We watch RFD daily for their excellent coverage of the commodities information as well as numerous other shows. Their weather report is more accurate than the weather channel. We would not be subscribing to any service that did not have RFD. I find it very arrogant of the big cable companies that they feel they know what we should be watching. We are not farmers but do live in a medium size town. We don't believe the government has the right to decide what we can and cannot watch in our home, especially when we are paying for the service. If a provider does not have the channels we like to watch we would cancel the service and look for alternatives that meet our interests.
