

Dear Sir:

I find it extremely disturbing that ATT can arbitrarily decide what viewers over 55 want to watch, and eliminate RFDTV from viewing access. I have watched Direct TV for over 20 years, and many of the shows I watch are on the RFDTV channel. Elimination of RFDTV means I will lose those channels, and the 60 million viewers who depend on agriculture news, and stock prices will be left in the cold. If this bill goes through, I will be canceling my subscription to Direct TV, and streaming all my shows from the internet.

Please don't ignore over 60 million of your viewers because of age or the fact that they are rural viewers.

Sincerely: Rodger Marty
