Net Neutrality matters because this is a free country. It is unfair and wrong to let corporations decide what information is shared and what information is not. Internet is a basic need, and every human deserves free and equal access to it in all its entirety. It is important that we keep it free and regulate it so that it is kept fair. The american people are tired of our rights and freedoms being sold behind our backs for giant corporations. DO YOUR JOBS. Protect us like you're supposed to. You're people too, so show it. Show the american people that the FCC is in fact made of up HUMAN BEINGS that happen to have a conscience and might have trouble sleeping at night if they ruined the entire internet in the name of corporate greed. Do the right thing and PROTECT NET NEUTRALITY.
