Dear FCC, Abolishing Net Neutrality however you spin it, (fast lane slow lane, whatever) is an atrocity. Stop listening to lobbyists and listen to the general public. It is not your job to satiate these companies and create more revenue streams for these business to further squeeze the average Joe of America.

If you were to implement these changes, companies paying for the premium speed services will end up passing the costs onto consumers and yet another charge will find its way back to us.

Just leave the internet alone. Please!!
