Net neutrality is vital to freedom of speech in America; I am disabled and most of my banking, information gathering, socializing through the internet. We already have monopolies in the Internet Service Provider industry...most consumers in American have access to only two Internet Service Providers companies. Americans already pay more than any nation in the world for internet service, with slower downloading speed. The two tier system is so important to greedy Comcast and Time Warner they are suing the government to be sure that they can make more money at the expense of me. Net neutrality is a boring term for getting F\*\*\*\*\*ed by internet service providers. If they used a more accurate term, more people would be up in arms. Protect me and my kind, please, by keeping the internet neutral. Don't sell us out.
