Five-Year Service Quality Improvement Plan

Study Area Code	533336
Study Area Name	Oregon Telephone Corporation-
Program Year	MTE
Contact Name	2015
Contact Telephone Number	DELINDA KLUSER
Contact Email Address	541 932 4411
	dkluser@ortelco.net

Oregon Telephone Corporation-MTE
FIVE YEAR SERVICE QUALITY IMPROVEMENT PLAN

PREAMBLE

This 5 year improvement plan is a section of the Company's 2014 Annual Report. It is in compliance with § 54.313(a)(1) adopted in the FCC's USF/ICC Transformation Order (11-161). This document also incorporates further clarifications identified in subsequent Reconsideration Orders, as applicable, in effect prior to the filing of the Annual Report.

Oregon Telephone Corporation-MTE ("MTE") has carefully developed its improvement plan, concentrating on the delivery and continuation of a robust network which provides, at a minimum, the federally required voice and broadband connectivity as stipulated by regulatory rule. In certain situations (and as noted herein), the plan may also incorporate specific state requirements.

MTE is currently a recipient of state support from the Oregon Universal Service Fund ("OUSF"). However the Fund is currently under formal state commission staff investigation (docket UM 1481), to assure the Fund contribution and support mechanisms, and those qualifying for support, are in concert with the current regulatory and market conditions. The outcome of the OUSF docket, the timing of a decision, and its impact upon MTE is unknown at the time of the report.

MTE advises that this improvement plan has been carefully crafted, matching measured network deployment, improvement and quality service levels with known financial implications of the Transformation Order upon the company's support cash-flows. The uncertainty of such cash flows being received in the outer-years as a result of current and potential regulatory action on rural rate-of-return carriers has resulted in the Company taking a balanced yet realistic approach.

The environment in which the Company operates remains dynamic, not static. As a result, MTE reserves the opportunity to modify its plan in response to further regulatory decisions as

they are adopted, and their implication upon the Company's financial viability in providing the required services and service level quality becomes known.

MTE will re-evaluate this plan on an annual basis. Action, however, may also be taken abruptly on the presented plan for both current and outer years in the event of evolving regulatory conditions and/or changes in technology (vendor)-driven support. All adjustments to the improvement plan in this document will be reflected and explained in subsequent annual reports.

OVERVIEW

MTE, as an Eligible Telecommunications Carrier (ETC) provides Universal Service supported services to approximately 190 customers in two exchanges covering approximately 540 square miles.

Consistent with Commission requirements, this Service Quality Improvement Plan addresses only MTE's regulated eligible telecommunications carrier operations.¹ A detailed description of MTE's plans for the provision of the supported services in the five-year period starting with January 2015 is provided herein.

Per the Universal Service Administrative Company (USAC), for the calendar year 2013, MTE received a total of \$105,711 (as of 05/29/14) in USF support funds. The breakdown of the funding for the year was:

- \$ 53,001 High Cost Loop Support,
- \$ (51,102) Local Switching Support-Prior Period Adjustment
- \$ 47,598 Connect America Fund-Intercarrier Compensation Support
- \$ 56,214 Interstate Common Line Support
- \$ 0 Safety Net Additive

All funds were used in 2013 to both: 1) maintain, upgrade, and improve the Company's network and, 2) cover its operating expenses and debt commitments as necessary to permit it to offer a high level of service for both voice and broadband throughout its service area.

IMPROVEMENT PLANS BY YEAR (2015-2019 inclusive)

Summary descriptions of network improvements planned for the next five years in accordance with Part 54.202(a)(1)(ii) and Part 54.313(a)(1) by year and by exchange are presented below. Detailed expenditures are summarized in the attached Excel worksheet (Attachment 1). Where available, area and subscribers impacted by the improvements are identified in the worksheet. Costs are broken out by voice and broadband service.

- Network improvement expenditures identify the cost to provide those services supported by the universal service funding mechanisms. When a project involves expenditures for

¹Per 47 C.F.R. § 54.314, federal USF support, "will be used only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." If investments or expenses are for service areas larger than the supported service areas, then allocations of the expenditures are required.

both regulated and non-regulated services, the non-regulated investment costs have been removed. The Company estimates non-regulated costs using the appropriate allocation rules. Details of those costs are retained by the Company and available for inspection.

- Costs are reported only for those service areas in which the Company is authorized to receive USF funding.

Due to the current uncertainty of the amounts of support funds the company may receive in future years, MTE advises the Commission that the deployment of specific network improvement projects may be modified, and the meeting of projected service goals muted, to accommodate the actual amount of support that will be received.

BASELINE NARRATIVE

MTE is an independent local exchange carrier providing telecommunications services in Malheur County in eastern Oregon. It serves a current population of approximately 420, over a geographic area of 540 sq. miles. MTE provides service to the unincorporated areas of Harper and Juntura. The service territory is largely on a valley floor that is long and narrow. The valley is surrounded on both sides by mountains. The Malheur River winds along the valley crossing the highway back and forth several times. There is a large percentage of the surrounding area that is managed by the Bureau of Land Management. The economic base is largely ranching. There is a small public school in each exchange. At this time, the Company provides phone and data service to these schools.

MTE serves its subscribers using a soft switch. MTE was able to construct a fiber route to the Harper exchange in 2012 bringing high-speed Broadband to the area. The Juntura area currently is served by a satellite T-1 allowing maximum data speeds of 256K up and down. This is currently the only economically viable/available alternative. At year-end 2013, MTE served 190 voice subscribers. The Company also serves 54 DSL/Broadband subscribers. There are 11 subscribers served by the satellite backbone. There are 200 route miles of facilities.

While no terrestrial competitor offers voice and data service throughout MTE's service area, Verizon Wireless provides service in the Juntura exchange.

MTE was acquired in 2010 by Oregon Telephone Corporation and as such remains the managing company of MTE. It is MTE's plan to build out fiber to the Juntura area and to additional repeater sites in order to increase Broadband speeds for all of its customers. Many of MTE's customers remain copper fed. MTE's toll network is also all copper.

SUMMARY DISCUSSION OF PLANS BY YEAR

2015

Juntura Fiber Build: For 2015, MTE intends to use operating cash flow, which includes support funds, to deploy mainline fiber to the Juntura Central Office. This project will start at the

outskirts of Oregon Telephone Corporation's Unity exchange and continue through both private and public lands.

The Fiber Project cost is estimated at \$756,000 to be spread between multiple years. The project involves placement of approximately 37 route miles of fiber to 60 subscribers currently served over copper. When complete, these 60 subscribers will have a minimum of 1 MB upload and 6 MB download broadband speeds available. The area currently has 11 internet subscribers served by a satellite backhaul. Many of the existing customers have dial-up internet or satellite internet. MTE expects an increase in broadband services as a result of this project based on past experience with fiber upgrades to existing exchanges. This project was staked in fall 2012 and existing subscribers were informed at that time of the Company's plans to upgrade their service. As a result of a short construction season necessitated by extreme weather conditions, this project is scheduled for completion in the third quarter 2015. The Company's Field Engineer will be on-site, working alongside the construction crews on a daily basis and will provide weekly Progress Reports to Company Management to ensure deadlines are met.

The project however could face delays due to archeological concerns from the Bureau of Land Management. The project was slated to begin in 2014 however at this time work has not yet begun.

Transmission: This project will also require the addition of a new electronics in the field to replace the current system. The estimated cost of MTE labor and material will be \$45,000.

General Expenditures: MTE expects to spend \$2,500 in miscellaneous additions.

2016

Harper to Meet Point Fiber Build: Currently MTE's connection to our meet point is copper fed. Limitations on the number of T-1's required for future services no longer make this a feasible option in today's technology driven world. In 2016, assuming support becomes more predictable and continuing to upgrade remains economically viable MTE estimates a cost of \$70,000 to plow 2.5 miles of fiber to interconnect with the neighboring IXC. This project will be under the direct construction and supervision of the staff at Oregon Telephone Corporation.

General Expenditures: In 2016 the Company expects to spend \$5,000 in miscellaneous additions.

2017

DC Rectifier and Battery Upgrades: MTE's policy is to upgrade emergency and backup power generation capabilities on a rotating basis. Battery life and years in service are evaluated each year and replacements are completed as necessary. Generators and batteries at each Central Office and batteries at each DLC or remote are all considered. Rectifiers and inverters are also included. In 2017, assuming support becomes more predictable and continuing to upgrade remains economically viable MTE plans to replace batteries in DLC's during 2017. The budgeted amount is \$5,000. The Company also has plans to replace the generator at the Harper Central Office during 2017, currently estimated at \$5,000. These are all scheduled to be in service by the end of 2017. Each of these upgrades will be installed by Oregon Telephone Corporation employees.

General Expenditures: In 2017 the Company expects to spend \$2,000 in miscellaneous additions.

2018

DC Rectifier and Battery Upgrades: MTE's policy is to upgrade emergency and backup power generation capabilities on a rotating basis. Battery life and years in service are evaluated each year and replacements are completed as necessary. Generators and batteries at each Central Office and batteries at each DLC or remote are all considered. Rectifiers and inverters are also included. In 2018, assuming support becomes more predictable and continuing to upgrade remains economically viable a generator replacement is planned for the Juntura Central Office. This is estimated to cost \$5,000. This upgrade will be installed by Oregon Telephone Corporation employees.

General Expenditures: In 2018 the Company expects to spend \$3,000 in miscellaneous additions.

2019

As is our policy with critical network equipment, replacement of equipment deployed in the field must be replaced on a rotational basis. During 2019 it is estimated that upgrades and/or replacement of remote cabinets should begin. In 2019, assuming support becomes more predictable and continuing to upgrade remains economically viable, the estimated cost of the upgrades is \$50,000. The project will be under the direction of both Oregon Telephone Corporation's internal engineer as well as a vendor's engineer.

General Expenditures: In 2019 the Company expects to spend \$3,000 in miscellaneous additions.

54.313 Lifeline customers MOU and additional toll charges

Lifeline subscribers receive the same residential service as a regular subscriber, but at a reduced monthly recurring rate. Thus, lifeline subscribers have an unlimited number of local calling minutes. As for toll, lifeline subscribers, similar to every Oregon Telephone-MTE subscriber, are free to choose their own toll usage plans through IXC's that serve Oregon Telephone Corp-MTE.

The following financial report contains financial data for both Oregon Telephone Corporation (SAC 532389) and Oregon Telephone Corporation-MTE (SAC 533336). The companies operate on a consolidated basis and separated results are not available.

ing to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0572-0011. The time required to complete this information collection is estimated to average 4 hours per response, including the time for reviewing instructions, gathering data and materials, reviewing the data needed, and completing and reviewing the collection of information.

Revision Date 2010

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH ASPECTS OF
CONTRACTUAL AGREEMENTS AND REGULATORY REQUIREMENTS FOR
TELEPHONE BORROWERS

The Board of Directors
Oregon Telephone Corporation
Mt. Vernon, Oregon

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the consolidated financial statements of Oregon Telephone Corporation, which comprise the consolidated balance sheets as of December 31, 2013 and 2012, and the related consolidated statements of revenue, comprehensive income, stockholders' equity and changes in cash flows for the years then ended, and the related notes to the financial statements, and have issued our report thereon dated March 4, 2014. In accordance with *Government Auditing Standards*, we have also issued our report dated March 4, 2014, on our consideration of Oregon Telephone Corporation's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. No reports other than the reports referred to above related to our audit have been furnished to management.

In connection with our audit, nothing came to our attention that caused us to believe that Oregon Telephone Corporation failed to comply with the terms, covenants, provisions, or conditions of their loan, grant, and security instruments as set forth in 7 CFR Part 1773, *Policy on Audits of Rural Utilities Service Borrowers*, §1773.33 and clarified in the RUS policy memorandum dated February 7, 2014, insofar as they relate to accounting matters as enumerated below. However, our audit was not directed primarily toward obtaining knowledge of noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding Oregon Telephone Corporation's noncompliance with the above-referenced terms, covenants, provisions, or conditions of the contractual agreements and regulatory requirements, insofar as they relate to accounting matters. In connection with our audit, we noted no matters regarding Oregon Telephone Corporation's accounting and records to indicate that Oregon Telephone Corporation did not:

Maintain adequate and effective accounting procedures;

Utilize adequate and fair methods for accumulating and recording labor, material, and overhead costs, and the distribution of these costs to construction, retirement, and maintenance or other expense accounts;

Reconcile continuing property records to the controlling general ledger plant accounts;

Clear construction accounts and accrue depreciation on completed construction;

Record and properly price the retirement of plant;

Seek approval of the sale, lease or transfer of capital assets and disposition of proceeds for the sale or lease of plant, material, or scrap;

Maintain adequate control over materials and supplies;

Prepare accurate and timely Financial and Operating Reports:

Obtain written RUS approval to enter into any contract for the management, operation, or maintenance of the borrower's system if the contract covers all or substantially all of the telephone system;

Disclose material related party transactions in the financial statements, in accordance with requirements for related parties in generally accepted accounting principles;

Record depreciation in accordance with RUS requirements (See RUS Bulletin 183-1, Depreciation Rates and Procedures);

Comply with the requirements for the detailed schedule of deferred debits and deferred credits; and

Comply with the requirements for the detailed schedule of investments.

This report is intended solely for the information and use of the board of directors, management, and the RUS and supplemental lenders and is not intended to be and should not be used by anyone other than these specified parties. However, this report is a matter of public record and its distribution is not limited.

Contact E-Mail Address	dkluser@ortelco.net

54.313(g) Areas with no terrestrial backhaul

All Oregon Telephone Corporation-MTE exchanges, with the exception of Juntura have terrestrial backhaul. The satellite backhaul for Juntura supports a minimum service level of 128kdown/128kup. Satellite backhaul is being used because the cost to obtain commercial backhaul is cost prohibitive. Oregon Telephone Corporation-MTE continues to seek economically sound solutions to address this exchange for both terrestrial backhaul and in meeting minimum service speed levels.
