Five-Year Service Quality Improvement Plan

Study Area Code	532388
Study Area Name	North-State Telephone Co.
Program Year	2015
Contact Name	DELINDA KLUSER
Contact Telephone Number	541 932 4411
Contact Email Address	dkluser@ortelco.net

North-State Telephone Co.
FIVE YEAR SERVICE QUALITY IMPROVEMENT PLAN

PREAMBLE

This 5 year improvement plan is a section of the Company's 2014 Annual Report. It is in compliance with § 54.313(a)(1) adopted in the FCC's USF/ICC Transformation Order (11-161). This document also incorporates further clarifications identified in subsequent Reconsideration Orders, as applicable, in effect prior to the filing of the Annual Report.

North-State Telephone Co. (NSTC) has carefully developed its improvement plan, concentrating on the delivery and continuation of a robust network which provides, at a minimum, the federally required voice and broadband connectivity as stipulated by regulatory rule. In certain situations (and as noted herein), the plan may also incorporate specific state requirements.

NSTC is currently a recipient of state support from the Oregon Universal Service Fund ("OUSF"). However the Fund is currently under formal state commission staff investigation (docket UM 1481), to assure the Fund contribution and support mechanisms, and those qualifying for support, are in concert with the current regulatory and market conditions. The outcome of the OUSF docket, the timing of a decision, and its impact upon NSTC is unknown at the time of the report.

NSTC advises that this improvement plan has been carefully crafted, matching measured network deployment, improvement and quality service levels with known financial implications of the Transformation Order upon the company's support cash-flows. The uncertainty of such cash flows being received in the outer-years as a result of current and potential regulatory action on rural rate-of-return carriers has resulted in the Company taking a balanced yet realistic approach.

The environment in which the Company operates remains dynamic, not static. As a result, NSTC reserves the opportunity to modify its plan in response to further regulatory decisions as they are adopted, and their implication upon the Company's financial viability in providing the required services and service level quality becomes known.

NSTC will re-evaluate this plan on an annual basis. Action, however, may also be taken abruptly on the presented plan for both current and outer years in the event of evolving regulatory conditions and/or changes in technology (vendor)-driven support. All adjustments to the improvement plan in this document will be reflected and explained in subsequent annual reports.

OVERVIEW

NSTC, as an Eligible Telecommunications Carrier (ETC) provides Universal Service supported services to approximately 389 customers covering approximately 330 square miles.

Consistent with Commission requirements, this Service Quality Improvement Plan addresses only NSTC's regulated eligible telecommunications carrier operations.¹ A detailed description of NSTC's plans for the provision of the supported services in the five-year period starting with January 2015 is provided herein.

Per the Universal Service Administrative Company (USAC), for the calendar year 2013, NSTC received a total of \$1,512,816 (as of 05/29/14) in USF support funds. The breakdown of the funding for the year was:

- \$1,028,922 High Cost Loop Support,
- \$ 9,486 Local Switching Support-Prior Period Adjustment
- \$ 46,878 Connect America Fund-Intercarrier Compensation Support
- \$ 416,427 Interstate Common Line Support
- \$ 11,103 Safety Net Additive

All funds were used in 2013 to both: 1) maintain, upgrade, and improve the Company's network and, 2) cover its operating expenses and debt commitments as necessary to permit it to offer a high level of service for both voice and broadband throughout its service area.

IMPROVEMENT PLANS BY YEAR (2015-2019 inclusive)

Summary descriptions of network improvements planned for the next five years in accordance with Part 54.202(a)(1)(ii) and Part 54.313(a)(1) by year and by exchange are presented below. Detailed expenditures are summarized in the attached Excel worksheet (Attachment 1). Where available, area and subscribers impacted by the improvements are identified in the worksheet. Costs are broken out by voice and broadband service.

- Network improvement expenditures identify the cost to provide those services supported by the universal service funding mechanisms. When a project involves expenditures for both regulated and non-regulated services, the non-regulated investment costs have been removed. The Company estimates non-regulated costs using the appropriate allocation rules. Details of those costs are retained by the Company and available for inspection.

¹Per 47 C.F.R. § 54.314, federal USF support, "will be used only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." If investments or expenses are for service areas larger than the supported service areas, then allocations of the expenditures are required.

- Costs are reported only for those service areas in which the Company is authorized to receive USF funding.

Due to the current uncertainty of the amounts of support funds the company may receive in future years, NSTC advises the Commission that the deployment of specific network improvement projects may be modified, and the meeting of projected service goals muted, to accommodate the actual amount of support that will be received.

BASELINE NARRATIVE

NSTC is an independent local exchange carrier providing telecommunications services in Wasco County in Oregon. There are approximately 244 households in Dufur with a current population of 605, over a geographic area of 330 sq. miles. NSTC provides service to the city of Dufur which is located between Mount Hood and the Deschutes River. The service territory is largely on rolling hills however the soil condition is composed of extremely hard rock. The economic base is largely farming of wheat, tree fruit and grapes. There is a public school in the exchange. At this time, the Company provides phone service only to the school. Data services are currently provided by the ESD.

The median household income is approximately \$37,500. Currently we have 10 Lifeline subscribers.

NSTC serves its subscribers using a soft switch. NSTC was able to procure a fiber backbone in 2013 bringing even higher speed broadband to the area. NSTC has been using RUS funds for a number of years to continually upgrade and build-out areas. Our wire center contains FTTH customers. It is NSTC's plan to build out fiber to repeater sites in order to increase Broadband speeds for customers on the outskirts currently served by copper.

Subscribers currently served by FTTH are able to receive a minimum of 3MB upload and 10MB download. There are currently 19 subscribers served by copper with 756K upload and 1.5MB download speeds. Currently NSTC serves 255 DSL/Broadband customers. There are 217 route miles of facilities.

While no terrestrial competitor offers voice and data service throughout the service area, competition is limited to AT&T Wireless and Verizon Wireless in the exchange. NSTC has lost both voice and data subscribers due to unemployment and competition in the area.

NSTC's toll network is also fiber fed.

NSTC has been using RUS funds for a number of years to continually upgrade and build-out areas. Payments of those loans come from cash flows of support payments. Much of our wire center contains FTTH customers. It is NSTC's plan to build out fiber to repeater sites in order to increase Broadband speeds for customers on the outskirts.

SUMMARY DISCUSSION OF PLANS BY YEAR

2015

Long Hollow Fiber Build: For 2015, NSTC intends to use operating cash flow to deploy mainline and drop fiber to the Long Hollow area. This project will continue from the 2014 Easton Canyon Project.

The Fiber Project cost is estimated at \$125,000. The project involves placement of approximately 2.5 route miles of fiber to 3 subscribers currently served over copper. When complete, these 3 subscribers will have a minimum of 1 MB upload and 6 MB download broadband speeds available. NSTC expects an increase in broadband services as a result of this project based on past experience with fiber upgrades to existing exchanges. This project was staked in fall 2013 and existing subscribers were informed at that time of the Company's plans to upgrade their service. As a result of a short construction season necessitated by extreme weather conditions, this project is scheduled for completion in the third quarter 2015. The Company's Field Engineer will be on-site, working alongside the construction crews on a daily basis and will provide weekly Progress Reports to Company Management to ensure deadlines are met.

Transmission: This project will also require the addition of a new electronics in the field to replace the current system. The estimated cost of NSTC labor and material will be \$4,000.

DC Rectifier and Battery Upgrades: NSTC's policy is to upgrade emergency and backup power generation capabilities on a rotating basis. Battery life and years in service are evaluated each year and replacements are completed as necessary. Generators and batteries at the Central office and batteries at each DLC or remote are all considered. Rectifiers and inverters are also included. In 2015, assuming support becomes more predictable and continuing to upgrade remains economically viable NSTC has planned on replacing batteries in the Central Office. The budgeted amount is \$50,000.

Vehicles: In 2015 the Company plans to replace one service truck. Because the Company's service area is so large, by necessity significant miles (an average of 30,000 annually) are put on service trucks in order to serve subscribers. To ensure the safety of employees as well as ensuring serviceable vehicles, the Company replaces most fleet vehicles every six years. The vehicle to be replaced in 2015 is expected to cost \$35,000.

General Expenditures: NSTC expects to spend \$12,000 in miscellaneous additions.

2016

Tygh Road Fiber Build: In 2016, assuming support becomes more predictable and continuing to upgrade remains economically viable, NSTC intends to use operating cash flow to deploy mainline and drop fiber to the Tygh Road area. This project will continue from the 2015 Long Hollow Project.

The Fiber Project cost is estimated at \$215,000. The project involves placement of approximately 5.5 route miles of fiber to 14 subscribers currently served over copper. When complete, these 14 subscribers will have a minimum of 1 MB upload and 6 MB download broadband speeds available. NSTC expects an increase in broadband services as a result of this project based on past experience with fiber upgrades to existing exchanges. This project was staked in fall 2013

and existing subscribers were informed at that time of the Company's plans to upgrade their service. As a result of a short construction season necessitated by extreme weather conditions, this project is scheduled for completion in the third quarter 2016. The Company's Field Engineer will be on-site, working alongside the construction crews on a daily basis and will provide weekly Progress Reports to Company Management to ensure deadlines are met.

Transmission: This project will also require the addition of a new electronics in the field to replace the current system. The estimated cost of NSTC labor and material will be \$3,000.

General Expenditures: In 2016 the Company expects to spend \$12,000 in miscellaneous additions.

2017

DC Rectifier and Battery Upgrades: NSTC's policy is to upgrade emergency and backup power generation capabilities on a rotating basis. Battery life and years in service are evaluated each year and replacements are completed as necessary. Generators and batteries at each Central office and batteries at each DLC or remote are all considered. Rectifiers and inverters are also included. In 2017, assuming support becomes more predictable and continuing to upgrade remains economically viable, NSTC has planned on replacing rectifiers during 2017. The budgeted amount is \$15,000.

97 North to Ward Mill Fiber project: For 2017, NSTC intends to use operating cash flow to deploy mainline and drop fiber to the final area in the Dufur exchange. This project will continue from prior year's projects.

The Fiber Project cost is estimated at \$100,000. The project involves placement of approximately 2 route miles of fiber to 2 subscribers currently served over copper. When complete, these 2 subscribers will have a minimum of 1 MB upload and 6 MB download broadband speeds available. NSTC expects an increase in broadband services as a result of this project based on past experience with fiber upgrades to existing exchanges. This project was staked in fall 2013 and existing subscribers were informed at that time of the Company's plans to upgrade their service. As a result of a short construction season necessitated by extreme weather conditions, this project is scheduled for completion in the third quarter 2017. The Company's Field Engineer will be on-site, working alongside the construction crews on a daily basis and will provide weekly Progress Reports to Company Management to ensure deadlines are met.

Transmission: This project will also require the addition of a new electronics in the field to replace the current system. The estimated cost of NSTC labor and material will be \$3,000.

General Expenditures: In 2017 the Company expects to spend \$12,000 in miscellaneous additions.

2018

Building: In 2018, assuming support becomes more predictable and continuing to upgrade remains economically viable NSTC, has plans to improve the current warehouse through a remodeling project. The estimate for this project is \$50,000. The Company will work with a general contractor throughout the entire project.

General Expenditures: In 2018 the Company expects to spend \$7,000 in miscellaneous additions.

2019

As is our policy with critical network equipment, replacement of equipment deployed in the field must be replaced on a rotational basis. During 2019 it is estimated that upgrades and/or replacement of remote cabinets should begin. In 2019, assuming support becomes more predictable and continuing to upgrade remains economically viable, the estimated cost of the upgrades is \$50,000. The project will be under the direction of both Oregon Telephone Corporation's internal engineer as well as a vendor's engineer.

General Expenditures: In 2019 the Company expects to spend \$13,000 in miscellaneous additions.

54.313 Lifeline customers MOU and additional toll charges

Lifeline subscribers receive the same residential service as a regular subscriber, but at a reduced monthly recurring rate. Thus, lifeline subscribers have an unlimited number of local calling minutes. As for toll, lifeline subscribers, similar to every North-State Telephone subscriber, are free to choose their own toll usage plans through IXC's that serve North-State Telephone Co.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number for the information collection. The time required to complete this information collection is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Revision Date 2010

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH ASPECTS OF
CONTRACTUAL AGREEMENTS AND REGULATORY REQUIREMENTS FOR
TELEPHONE BORROWERS

Board of Directors
North State Telephone Company and Subsidiaries
Mt. Vernon, Oregon

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the consolidated financial statements of North State Telephone Company and Subsidiaries, which comprise the consolidated balance sheet as of December 31, 2013 and 2012, and the related consolidated statements of revenue, comprehensive income, stockholders' equity and changes in cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated February 24, 2014. In accordance with *Government Auditing Standards*, we have also issued our report dated February 24, 2014, on our consideration of North State Telephone Company and Subsidiaries' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. No reports other than the reports referred to above related to our audit have been furnished to management.

In connection with our audit, nothing came to our attention that caused us to believe that North State Telephone Company and Subsidiaries failed to comply with the terms, covenants, provisions, or conditions of their loan, grant, and security instruments as set forth in 7 CFR Part 1773, *Policy on Audits of Rural Utilities Service Borrowers*, §1773.33 and clarified in the RUS policy memorandum dated February 7, 2014, insofar as they relate to accounting matters as enumerated below. However, our audit was not directed primarily toward obtaining knowledge of noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding North State Telephone Company and Subsidiaries' noncompliance with the above-referenced terms, covenants, provisions, or conditions of the contractual agreements and regulatory requirements, insofar as they relate to accounting matters. In connection with our audit, we noted no matters regarding North State Telephone Company and Subsidiaries' accounting and records to indicate that North State Telephone Company and Subsidiaries did not:

Maintain adequate and effective accounting procedures;

Utilize adequate and fair methods for accumulating and recording labor, material, and overhead costs, and the distribution of these costs to construction, retirement, and maintenance or other expense accounts;

Reconcile continuing property records to the controlling general ledger plant accounts;

Clear construction accounts and accrue depreciation on completed construction;

Record and properly price the retirement of plant;

Seek approval of the sale, lease or transfer of capital assets and disposition of proceeds for the sale or lease of plant, material, or scrap;

Maintain adequate control over materials and supplies;

Prepare accurate and timely Financial and Operating Reports;

Obtain written RUS approval to enter into any contract for the management, operation, or maintenance of the borrower's system if the contract covers all or substantially all of the telephone system;

Disclose material related party transactions in the financial statements, in accordance with requirements of related parties in generally accepted accounting principles;

Record depreciation in accordance with RUS requirements (See RUS Bulletin 183-1, Depreciation Rates and Procedures) and

Comply with the requirements for the detailed schedule of investments.

This report is intended solely for the information and use of the board of directors, management, and the RUS and supplemental lenders and is not intended to be and should not be used by anyone other than these specified parties. However, this report is a matter of public record and its distribution is not limited.
