

7521351684.txt

Hello,

I am a small business owner, and I urge the FCC to drop the idea of paid prioritization and enforce Net Neutrality. My business, and many other small businesses like mine, will not be able to afford to pay for priority access. This will cause material damage to small American employers, like me, that are the lifeblood of this great country. Please do not kill the job growth potential of American small businesses like mine.

Sincerely,
Daniel Roesler
