Do not allow 'new neutrality' to be passed. This has become virtually a complete monopoly between Comcast and Time Warner Cable. Similar to NJ Governor Chris Christie's past in giving groups difficulty if they don't abide to his requests, it's been shown that these two services above will 'play favorites' (people will receive slower connection times from one of them if these companies arbitrarily desire) . If you want to see proof, look at "John Oliver Goes Off on an Epic, Fact-Checked, Mic-Dropping Rant for 13 Minutes that you need to See" on YouTube.

Again, keep the Internet open, allowing equal access and speed to all sites.

Thank you,
Steven Cooke
