Functionality in Emergency Situations:

Voice Network

Pursuant to 47 C.F.R. § 54.313(a)(6) and 47 C.F.R § 54.22(b)(4) as set forth in 47 C.F.R. § 54.202(a)(2) Texas RSA 3 Limited Partnership (“Plateau”) meets the requirements to remain functional in emergency situations and has the following capabilities: Back-up power is provided to Plateau’s MSOs by use of generators and batteries that provide a minimum of 8 hours emergency power. In addition, Plateau’s towers have been equipped with a combination of generators and batteries that provide a minimum of 8 hours of emergency power with capabilities in many locations to remain operational for up to 20 hours on emergency power.

Plateau has fiber optics deployed to many of its towers and in addition has redundant fiber optic paths from its core switching network allowing Plateau the capabilities to reroute traffic in emergency situations. Plateau has properly prepared itself for any network outages by having redundant and diverse routing in place to manage any outages and has also purchased sufficient replacement parts for its core network equipment to ensure a reliable network. For added security, reliability, and connectivity in emergency situations, Plateau has interconnection with the LATA tandem, other local exchange carriers and other wireless carriers. For added emergency functionality, Plateau has two Cell-on-Wheel (“COW”) mobile towers. These COWs allow Plateau to quickly respond to emergency situations, including network outages.

Lastly, Plateau has developed network preparedness plans in case of emergency situations. Plateau has sufficient capacity within its switching network to handle call spikes in emergency situations and its staff has been sufficiently trained on those preparedness plans to minimize any and all outages during emergency situations.

Voice Services Comparability Report

Pursuant to 47 C.F.R. § 54.313 (a) (10) Texas RSA 3 Limited Partnership (“Plateau”) is in compliance with the requirement that voice services is no more than two standard deviations above the national average urban rate for voice service of \$46.96 as specified in Public Notice DA 14-384 issued on March 20, 2014. Plateau’s current total local end-user rate¹ of \$20.64 (which includes a local fee of \$19.95, mandated state fees of \$0.69 and mandatory extended area service charges of \$0) is not above the standard deviation as specified in the USF/ICC Transformation Order.²

¹ Local End User Rate as defined in USF/ICC Transformation Order 26 FCC Rcd at 17751, Para. 238

² USF/ICC Transformation Order, 26 FCC Rcd at 17694, Para. 84 (footnote included) “The standard deviation is a measure of dispersion. The sample standard deviation is the square root of the sample variance. The sample variance is calculated as the sum of the squared deviations of the individual observations in the sample of data from the sample average divided by the total number of observations in the sample minus one. In a normal distribution, about 68 percent of the observations lie within one standard deviation above and below the average and about 95 percent of the observations lie within two standard deviations above and below the average.”
