**Cox Serviceability Process Flow**

Form 481 – Line 310

**REDACTED FOR PUBLIC INSPECTION**

## **Service Quality Standards & Consumer Protection**

Form 481 – Line 510

Cox is committed to meeting all applicable customer service requirements. This commitment is part of a company-wide effort to maintain the highest possible level of customer satisfaction for telephone, cable and Internet services, and is reflected in the J.D. Power awards that Cox Communications has won over since 1996.

As part of its efforts to provide the highest levels of service, Cox focuses on providing quality customer service and a reliable network. Cox strives to meet or exceed the Commission's service objectives articulated in the orders of the commissions of the various states in which it provides service.

An important component of Cox's customer service focus is the use of customer satisfaction surveys. These surveys are always ongoing with regular reviews of the results being translated into customer service improvement efforts. Cox is also furthering its efforts to understand customer satisfaction via the launch of an email based survey for post telephone call reviews.

Cox continues to comply with all mandated consumer protection requirements, including the federal Truth-In-Billing rules, advertising requirements, tariffing obligations and state-specific requirements governing customer notices, late fees, disputes and other consumer issues. Cox believes that it is important to treat all of its customers fairly, not just as a matter of business or legal requirements, but because respect for consumers is essential to the company's relationship with its customers.

## **Functionality in Emergency Situations**

Form 481 – Line 610

Cox has designed its network to be resilient in emergencies. Cox has included back-up power in its network designs to ensure that its customers retain service even when commercial power is unavailable. Cox uses route diversity and other techniques to limit the likelihood that damage to its facilities will cut off service to its customers. Further, Cox's IP-based telephone service includes battery backup in the customer equipment in accordance with industry standards and relevant regulatory requirements.<sup>1</sup> These features allow Cox to maintain service even when there are substantial power outages within its service area.<sup>2</sup>

Cox also is compliant with all relevant 911 and E911 requirements. Where E911 is available in a local community, Cox ensures that all necessary information, including location information and callback data, is provided to the local E911 database and available to the Public Safety Answering Point ("PSAP"). Cox has provided 911 and E911 since it began offering telephone service, and has offered full 911 and E911 capability for both its circuit-switched and IP-based products.

Finally, Cox follows industry standard procedures for addressing traffic spikes within its network, including implementing call gapping when appropriate. In addition, Cox seeks to avoid network congestion issues by monitoring traffic on an on-going basis and sizing its network and interconnection facilities to maintain call blocking below industry standard levels.

---

<sup>1</sup> Cox has implemented a program for replacement of the backup batteries to ensure that customers do not experience unexpected loss of service.

<sup>2</sup> Cox prides itself on its exemplary record of service maintenance and service recovery after hurricane or other natural damage to its network throughout its entire US footprint.
