Net Neutrality is important to me and to everyone else because it allows for everyone to have access to the same things. If it ends, only people with money will have won and it would seriously impact the freedom of people. The only people who would benefit is the seriously rich and help to make them even richer than they are. Millions of people work but do not make enough money to pay for a "fast tiered" internet just because companies want to make themselves richer. Please keep the internet neutral and allow access for everyone. Thank you.
