

7521363845.txt

There has never been anything like the Internet in history. Humanity has unparalleled access to information and to an egalitarian space that allows everyone equal chance to be heard. Huge corporations like Verizon, AT&T, and Comcast will always find ways to get around regulations to keep them from owning (see: ruining) everything, but that doesn't mean you need to hand them an EASY victory. Stand up to them. Do what the FCC is supposed to do. Protect Net Neutrality and equal access for EVERYONE.
