please do not allow independent television removals such as RFD-TV if AT&T and Direct TV's merger is approved. RFD-TV delivery of rural programming to both urban and rural areas contributes to connecting city and country and gives rural communities programming that is not only of interest or entertaining but that is often critical to more fully understanding rural economic issues, As Mr. Gottsch stated in his testimony for RFD-TV Agriculture markets are international in scope and very important in rural areas, yet those markets are often nearly ignored by urban focused economic market reporting.
