I am a Time Warner Customer. I am writing this today to officially denounce the proposed merger of Comcast and Time Warner. I didn't always have Time Warner, in fact before Timewarner acquire adelpia, they were my ISP. Given the choice I would drop Time Warner, as I am experiencing outages almost on a weekly basis. Given the choice I would move to a competitor, however, I can't because there *is* no competition available to me. My area has Verizon Fios, but not to my part, there is Champion in Arcadia, but they do not service Sierra Madre. I would have the choice of Time Warner, or no internet at all. I am STUCK. If Comcast acquires Time Warner, I *do not* have the freedom to change. In fact, it would be Comcast, or nothing. How is that fair? How is that not "competitive" like Comcast claims. It isn't. I do not want Comcast merging with Time Warner, because I have no say in what internet provider I get. I cannot "change if I don't like the service." I am stuck. Please deny the merger, do not listen to Comcast when it claims this merger will make things better. It won't. Comcast will own most of the east and west coast, and there will be only be MORE people like me. Stuck with a company they don't like but have no alternative. I am a heavy internet user, I don't want data caps, and I don't want Comcast which has said it plans to have data caps for all customers in 5 years, but if this gets approved, as stated above, I won't have a choice.

Thank you for your time and consideration of these comments in the matter of the TWC/Comcast proposed merger. It is my hope it can express my concern and worries over this as a TWC customer.
