The internet provider market is already a monopoly and removing or reducing the effectiveness of Net Neutrality will allow these monopolies too much power and control which translates to "pay or there is no other alternative" and sites and services could be hindered if they do not pay a fee. These are all reasons why net neutrality needs to stay unchanged. Should changes proceed, I will exercise my rights as a citizen to work toward reversing this decision and have those responsible removed from office/role by any legal means available to me. Thank you.
