

7521379315.txt

I'm writing this comment to voice my support for an open internet and net neutrality. As a citizen of the United States, a consumer, and an active Internet user, I believe that Chairman Wheeler's proposal is terrible and do not want this to become the law of the land. Please keep the Internet open by supporting a completely free and open Internet with OUT any fast lanes. All traffic should receive the same priority and none of it should be getting anywhere any faster or slow just based on its content or for any other reason. All traffic should be treated EQUALLY!
