Hello,

I want the FCC to rule ISPs as Title II Common Carriers. I support them being required to process all information equally. I support Congressional action to regulate ISPs as Title II Common Carriers.

ISP's are looking for more money while providing worse service. It is that simple. When an ISP does not process all information equally, they can choose what kind of content to funnel towards the public, effectively changing public opinion. This kind of power should not be wielded by any corporation. Please rule ISPs as Title II Common Carriers. Thank You.
