

The proposed Comcast–Time Warner Cable deal would create a television and Internet colossus like no other.

Comcast is the country's #1 cable and Internet company and Time Warner Cable is #2. Put them together and you get a single giant controlling a massive share of our nation's TV and Internet-access markets.

Putting this much power in the hands of one company is dangerous. This deal would lead to less consumer choice, less diversity and higher cable bills.

The Comcast service at my in-laws home in Kankakee, IL is terrible. They promise certain speeds and they under-deliver and are inconsistent.

The same is true for my parents home in Cleveland but they have Time Warner. The speeds are never consistent and they are never what they pay for. There has been zero improvements on the infrastructure but the rates keep going up.

Please take the necessary steps to block this merger.
