

7521380270.txt

I have started a few small companies that have provide good well paying employment to support over 24 families. I am very happy that I could be a part of the creation of this prosperity here in the United States.

None of these jobs would have been created if there was not a Net Neutral internet.

I need to stress that even the perception that the web was not neutral would have killed the projects.

Its not fair to allow the big boys of the internet to use public easements to conduct their business and to crush the little guy.
