

To the FCC:

Represent the PEOPLE and not the CORPORATIONS.

The internet is an amazing tool. I have been using it since I was very young and have grown with it. The things I have learned, the people I have met, and the experiences I have had have made me into an intelligent, upstanding citizen.

Net neutrality IS the way to go. Every website should be treated equally. There shouldn't be "fast lanes" for people. That will REMOVE competition because the smaller companies won't even be able to compete. It would create a monopoly or oligopoly in certain internet industries.

I realize that some of these CORPORATIONS are legally bribing, I mean lobbying, for these internet "fast lanes" and this is evidence that they want to rid the internet of competition.

Stand by the people. Be on the RIGHT side of the Internet like several other countries have been when it comes to net neutrality.

You may be richer today, but the people of tomorrow will suffer. Our lives are meaningless, the future of mankind is what matters. Allowing information to be openly shared is the best way for mankind to succeed.

Thank you.
