Dear FCC,

My name is Allen Freitas and I live in Stow, OH.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

I am an up and coming college student who sees the internet as the breeding ground for creativity and freedom and ending net neutrality will end this freedom that so many citizens love.

Sincerely,

Allen Freitas
