Dear FCC,

My name is Juan Vazquez and I live in North Hollywood, CA.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it the future of the United States as a leader in technological innovation will be compromised.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

The Internet is important to me because I believe in encouraging young entrepreneurs and technology professionals like myself to build great things.

Sincerely,

Juan Vazquez
