To Whom It May Concern:

Please consider reversing the decision regarding net neutrality and/or work to make the law as citizen friendly as possible, and less corporate friendly.

Additionally, please develop a new decision making body tied to net neutrality that is not closely and solely tied to communications corporations and those with which they sleep. Freedom of speech is unequivocally being not only put at risk but also blatantly silenced. Your oath to protect the citizens of the United States of America should be taken seriously and your recent need to disregard all people of the U.S. with the exception of corporations and the U.S. Government is scary and smacks of third world countries that we, as Americans have gone to war to free and protect.
