Dear FCC,

My name is Cal Wolansky and I live in Fairview Park , OH.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

the internet is important to me because as a young adult about to enter college anything that happens with the internet will affect me a lot more than it will affect you. You are a very rich and powerful person and I am just one kid trying to make a difference. so get your head straight and start being a better person, this life won't last forever. wouldn't you rather leave it being a good person who helped millions of people rather than the asshole that helped the rich monopoly get even richer and make the regular peoples lives worse.

Sincerely,

Cal Wolansky
