Please insure that if this merger does indeed take place with AT&T and Directv that RFD-TV is kept in place with Directv. As an agricultural and equestrian family, we depend on RFD-TV to keep informed on what is happening in the agricultural world. We believe that RFD-TV is an important means to promote the rural way of life to those in urban areas as well. There is currently so much, for lack of a better word, trash on TV that we strongly support the family oriented programming that appears on RFD-TV. The addition to RFD-TV to the Directv lineup years ago was such a betterment to the entertainment value we receive with this service. Please strongly consider keeping RFD-TV as a requirement for this merger to take place.
