

The internet should not be divided into fast and slow lanes. I would like to see the internet classified as a Title II carrier. For a free society, it is important to keep the internet open and the playing field level. I hope to open a business someday and a website will be the most important aspect. If consumer's cannot access my website, or give up trying because it is so slow, it is an effective block on my website. The internet should be allowed to continue on the same path it has, where everyone has equal access to all sites. Thank you.
