Have you seen what most TV stations are like now? You need to be very careful what you let your children or grand children watch. Even the cartoons are horable, on the verge of pornography. The rfdtv channel does not need to be monorted for children because the network does it for us, and you can trust what they put on the air. I have been watching this channel ever since it was avaiable to me and have never been di ssapointed wi th anything they broadcast over the air. I think it should be mandatory that every media provider should carry this network. Thank you for letting me comment on this merger. Billy Crisp.
