

7521390961.txt

As a software developer I am appalled by the proposed changes. As a citizen I am disappointed by the government that bends to lobbyist. The internet was founded on freedom of speech and an open playing field. Modifying that configuration is dangerous and can impact the economy in ways that you can't predict. Please reconsider the proposed changes and rethink why we need to make changes in the first place.

thanks,
-Pat
