I am copying and pasting something but first wanted to begin by saying how disappointed I am with the BS you guys pull over in Washington. How the fuck does someone run on hope, change, progress, and then select someone like TOM WHEELER to head the FCC. It is disgusting. I am disgusted. I am so offended by the shit the government is pulling that you guys are making me curse, something I never do. Don't fuck something good up for everyone-INCLUDING YOURSELVES-so a few people can make a lot more money they don't need more of because they already are run like monopolies. Please

make sure whatever Comcast is paying you millions of dollars to pass is not passed. I'm fine with you guys being corrupt, but instead of fucking the people you represent over, why not say fuck you to the hand that feeds you and let them know that corruption doesn't also mean sucking the dick of that hand.

Net neutrality is the First Amendment of the Internet, the principle that Internet service providers (ISPs) treat all data equally. As an Internet user, net neutrality is vitally important to me. The FCC should use its Title II authority to protect it.

Most Americans have only one choice for truly high speed Internet: their local cable company. This is a political failure, and it is an embarrassment. America deserves competition and choice.

Without net neutrality, a bad situation gets even worse. These ISPs will now be able to manipulate our Internet experience by speeding up some services and slowing down others. That kills choice, diversity, and quality.

It also causes tremendous economic harm. If ISPs can speed up favored services and slow others, new businesses will no longer be able to rely on a level playing field. When ISPs can slow your site and destroy your business at will, how can any startup attract investors?

My friends, family, and I use the Internet for conversation and fun, but also for work and business. When you let ISPs mess with our Internet experience, you are attacking our social lives, our entertainment, and our economic well being. We won't stand for it.

ISPs are opposing Title II so that they can destroy the FCC's net neutrality rules in court. This is the same trick they pulled last time. Please, let's not be fooled again. Title II is the strong, legally sound way to enforce net neutrality. Use it.
