

July 15, 2014

I wish to express my concern on Internet neutrality. The internet should be open. Time Warner, Comcast and every other internet provider should not be able to charge more for providing optimal speed from different websites. All data should be treated the same. The internet and cable providers are exerting their monopolies inappropriately. I support an open internet. No to a two tiered internet. It would sever the voice of the public, which is sadly favorable to many companies, ruin access to knowledge, thus having a negative impact on not only the education system but all fields of work and interest due to site discrimination. To me, allowing internet neutrality to be disregarded is a leap in the wrong direction and will severely hinder my home and yours, the United States of America.

Thank you for your time, Sicerly

Chris Lougee
