Dear FCC,

My name is Zenos Schmickrath and I live in Logan, UT.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

A free and open internet is important to me because as a struggling web entrepreneur, an internet where I must pay to reach my customers and compete will literally make it impossible for me to succeed.

Sincerely,

Zenos Schmickrath
