Dear FCC,

My name is Jakzeel Nunez and I live in St. Petersburg, FL.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

The Internet has been a place of learning, of socializing, and a way to cope with my health issues and depression. It is the only source that is reliable in this world - anything we desire to know we can know because of the internet.

Sincerely,

Jakzeel Nunez
