Net neutrality is the only way to ensure free speech, education for the moderate to low income, and anyone challenged by disability in our society. Favor ALL Citizens and make sure that no company can charge more for speed or access. Equal access is the heart of free speech and education.

Net neutrality is growing more and more essential for those living in rural communities (like me). Our rural communities feed the nation and yet our rural residents are being shut out at a shameful level by conglomerates from participation on the internet.

DO THE RIGHT THING FOR A CHANGE!!!
