Re: Proceeding Number 14-28
Protecting and Promoting the Open Internet

Dear FCC,

I understand what the Cable companies are proposing – controlling the internet in order for them to make more money. It's yet another example of 'Big Brother' strangling the everyday working and retired American and stealing from our already limited discretionary funds.

The proposed cable company request doesn't help anyone except big ISPs like Verizon and Comcast, who see it as a chance to make more money. WHAT ABOUT US? As an example I am a single retired 69 year old woman who recently retired after working 45 years. I supported myself, alone, and was not able to save much money. I will be living on my social security soon, with little back up at all.

I already pay Comcast for Basic Cable (39.99/mo) and 29.99/mo for Internet. Last month I called them to ask why my internet was so slow. They told me that for another \$10/month they could speed it up. So I agreed and have found, after a month, that it is no faster than before. So I'm going back to the slower speed because that \$10/month is precious to me.

It is not fair that I should be considered a LOWER CLASS CITIZEN just because I cannot afford to pay the Cable Companies for faster speed. We have a right to all be treated the same.

If the FCC passes this thing it will be yet another nail in the coffin that separates the tax paying citizens of our country. The USA Home of the Haves and Have Nots.
