

Dear FCC,

My name is Michael W. Oswald and I live in Granville, OH.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

The Internet is important to me because I go to school as a technical student. I perform my research for projects and I prefer to have them done on time. A lot of my shopping has also gone to being online for repairs for my computer and things I need.

That and it also does not affect just me. It affects the places that people work at. Company's that already have internet will have to pay more just so that they can send notifications to their employees.

Only the big companies will be able to stomach the stress of this new bill.

Have you seen the amount of debt america is in?

We can not afford more tax on our own goods. Cause that's what the internet is. A good. Raise the price for bread. That's one thing. but the internet is how I find everything I need.

The freedom of being creative and sharing the creativity is there. And you are destroying it.

America was founded for the free. Oh wait you forgot history classes.

Freedom is what its supposed to be. So I can only assume that you've forgotten by what your imposing to do. And yes I'M aware it makes an ass out of you and me. However The point is, your aiding the destruction of freedom of speech

The First Amendment protects the freedom of religion, SPEECH, PRESS, assembly, and petition. These freedoms allow citizens to express their IDEAS, OPINIONS, and beliefs? a hallmark of being American.

Think about it. Would you prefer your kids or grand kids or great grand kids to have a limited access to be able to create their own websites? Or start their own companies?

I wouldn't know. Cause to me it seems like you don't care. To me it seems that its about the money. It always is.

So instead of thinking about the money, think about us, the consumers, because the consumers never get the better side of anything. Its always somebody trying to screw us over.

Try to put yourself in our shoes. Put yourself in the shoes of a person that goes to school, has to pay fees, rent, food, gas, bills, and then extra, so HE can do his school work to get a job.

Wouldn't you prefer no fees on your internet bill if you only got paid 7.84 an hour? and worked for only 3 days a week? and got paid every two weeks?

So leave the internet as is. Surely you want a great country like most of everyone else does.

Or are you the people trying to tear it apart?

Sincerely,
