Dear FCC,

My name is Nick Ryan and I live in Lee, NH.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

Dude, the internet is like America, it's supposed to be free where anyone can succeed and speak their mind, but when big government douchebags like you come in here and start fucking shit up, that's when it becomes Russia, or even worse- Soviet Union Belarus. So dont screw this up, or the people will start a rebellion. In the words of mel gibson, "FREEEEEEEEED0000000000MMMM!!!!"

Sincerely,

Nick Ryan
