

7521629775.txt

The internet is the largest depository for information and services on the planet. No single entity has a right to be a "key master" of such a powerful tool. Corporations have no conscience, feeling, moral fortitude they exist for one reason alone. This reason to make money or to invest to make money.

STOP THE PRIVATIZATION OF THE INTERNET-

I oppose internet connection speed throttling and support Net Neutrality AND SO SHOULD YOU.

Reclassify all internet connections as a Title II Communication and secure the rights outlined in our nation's constitution from the human-less claws of multinational corporations like Comcast, Verizon, Cox, Time Warner, At&T, Charter, and NCTA.
