

Dear FCC,

My name is Brittany Faiola and I live in West Sacramento, CA.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it I wouldn't be able to afford my at home business that supports my family.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

The future of the Internet should be decided by the majority. The majority which uses the internet daily in order to organize, prioritize, and quickly move their lives. If net neutrality no longer exists, we as a people, will find a way to avoid paying for these services which originally were meant to help the American People. Don't limit US based on OUR wallets. Uplift US so we can do greater things. Help our families with an at home business, share art, contact far off relatives, listen to unknown music, start a trend. Let US believe that there are still freedoms that we are privileged to. Let US believe we are still a part of a FREE country that we can ALL prosper in.

Sincerely,

Brittany Faiola
