

Hello, I am writing to express my concern with the merger of Time Warner Cable and Comcast. I am against it and it should not be allowed to go through. I have Time Warner Cable TV and internet. I pay for a 20MB connection and on a good day I am lucky to see 2.5MB. I also have cable and there are always issues with channels not working or outages. If Comcast thinks that service will get better if they buy Time Warner then they are truly mistaken. It's sad when other countries have faster internet at a lower price. I hope my opinion doesn't fall upon deaf ears. I work in I.T. as a helpdesk technician so I know that customer service can make or break a company. I hope this comment lands in the hands of a person that will fight for us "the people".
