We understand what the GOVERNMENT TELLS US they want to accomplish with this "Trans Pacific Partnership". It's what we ARE NOT TOLD that has us concerned. SOPA, PIPA, COICA and CISPA have all been STRUCK DOWN because they INFRINGED on the FREEDOMS of liberty loving people EVERYWHERE. These "Blanket Laws" were rejected because they are MORALLY UNENFORCEABLE. They make it too easy to GROUP together the INNOCENT and the GUILTY and PUNISH them all the same. Though it is important to prevent unlawful distribution of copyrighted content, only those who profit or plagiarize should be held accountable. Those online who share with one another, or feature other peoples work in their projects are NOT -Pirates- or -Intellectual Property Thieves-. They're just people using the Internet in a way that-s enjoyable to them. Don-t hold innocent people accountable for the crimes of others. If the government censors our freedom of speech and expression, what will they censor next, our freedom to exist freely? These proposals are no different than the book burnings perpetrated by the Nazi -s during WWII. They destroyed anything that they -believed- to be subversive or tyrannical to their operations based on their own twisted ideals when in fact everything they eradicated was innocent. Allowing Major corporations to control what people can access on the internet is just a step... a step toward a world controlled by Businesses, not Governments. A world where Militaries don't serve countries but are owned by private firms. This kind of "Monetized Censorship" could bring companies A LOT OF MONEY and with that even MORE POWER by putting a PRICE on EVERYTHING and by forming MONOPOLIES. FIGHT FOR A FREE AND OPEN INTERNET- DON'T LET THE WORLD BE CONTROLLED BY GREEDY BUSINESSES MEN-

-The only thing necessary for the triumph of evil is for good men to do nothing. -
Edmund Burke

-Power corrupts, and absolute power corrupts absolutely. -
Lord Acton
