

7521677630.txt

Keep the net neutral! Net neutrality is imperative to keep a level playing field and to allow small business to survive and flourish. Please, keep the companies from creating a two tier system. The beautiful thing about the internet is the level playing field. Anyone with an idea and an internet connection has an opportunity to create the next great thing! If there is a two tier system the next best idea may never make it off the ground. Please keep the net neutral.
