Wheeler??s plan would let Internet service providers like AT&T, Comcast and Verizon create a two-tiered Internet, with fast lanes for those who can afford the extra fees and a slow dirt road for the rest of us. These companies would have the power to pick winners and losers online and discriminate against online content and applications. And no one would be able to do anything about it. I live on a fixed disability income and have no other source of income. My only entertainment is the internet and television because that is all I can afford. I can not afford to pay more in order to keep my service from slowing down, that is discriminatory at best.
