I want to reiterate that rural communities such as the one that I live in for all my life has been overlooked for broadband service. It has been difficult for me and others similarly situated in getting medium service speed I want to make sure that we don't get left out of the shuffle in terms of improving access to fast speedy internet service. Without that, we will get left even further behind economically. Please continue to invest in rural communities so that we can compete on a level playing field in terms of community and economic development.
