Dear FCC,

My name is Ted Thunder and I live in Lancaster, OH.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

Net neutrality is mandatory. The internet must be free. Anything otherwise will cause a revolution. Anyone responsible for ending net neutrality will be in danger and should be concerned for their safety.

Sincerely,

Ted Thunder
