Dear FCC,

My name is Dwayne Murray and I live in hudson, OH.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

Because the internet has become one of the prime sources of obtaining valid and current information about anything and everything! to allow Isps to profit off the free exchange of ideas is lunacy! We as the people have the right to FREELY EXPRESS our thoughts ideas and innovations! and a neutral net provides a equal opportunity for everyone.

Sincerely,

Dwayne Murray
