Stop messing with our internet! The internet provides us the means to freely express ourselves without ISP hindrance and that's the way it should be. Why are you taking away our means to view what we want to view and share what we want to share with digital policing in order to fill the pockets of people who already make too much money? Next, you'll be telling us internet users how to act and censor our freedom of speech for the sake of people who will pay to silence everyone else who doesn't agree with their views, right? Ridiculous!! Curb the discriminatory nonsense and let us surf how we want to surf! Reclassify ISPs as common carriers instead of freely allowing them to be overbearing autocratic money mongers!
