

I am writing to ask the FCC to deny the merger between Time-Warner and Comcast. Regardless of what the companies say, this would result in a monopoly. (3G and 4G networks are NOT the same as cable networks.) Customers would be abused by the companies even worse than they already are. Poor service would drop to no service, prices would rise and there would be no incentive for innovation or improvements. Once they have a stranglehold on the market, why should Comcast-TimeWarner do ANYTHING to serve the public good?

Please do not allow this to happen. Comcast has repeatedly been voted the Worst Company in America for numerous reasons, and this would only make things worse.
