We are concerned that RFD-TV may be dropped from DirecTV programming if a merger with AT&T occurs. We have found no other source of rural programming outside of RFD-TV. The high quality of wholesome programming isn't found elsewhere. The music programming is excellent, and again, we do not see that on any other network. Please give serious consideration to rural programming and the needs and wishes of the vast rural viewership who may be negatively impacted by this potential merger. If this merger is approved, please require that rural programming be included by AT&T.
