

7521727697.txt

Big business just keeps getting bigger and bigger and we are losing what little competition is left. These mergers are taking away our ability to watch rural tv that carries programming that is important to us.

Please do not allow this merger to happen and strip our ability to watch rural television on cable. This is our only channel in which we are able to watch Market Day Report in order to keep up with market prices for agriculture and livestock.

This rural programming provides family friendly television to our homes which is not available on other channels. This family friendly opportunity is important to our existence. Farmers are important to rural and urban america and provide our tables with the fresh vegetables that nourish our bodies.

Together we can get this done but we need your support in stopping this action.

Thank you,
Sharon Pitts
